Talking Business – Fantastic Service and Great People

We've been in business for five years in the Beresfield area. While we started with a good local internet provider, as we grew, they were swallowed up by a larger business. Our internet and telecommunications became beyond unreliable and frustrating. We felt like we just didn't matter anymore. Unreliable internet and no local support teams meant we were unable to service our clients and run our business with this service.

Then we saw the sign - a promo sign on a trailer at a nearby roundabout. We made contact and were promptly contacted by Brett and his team. They walked us through their service offering and pricing and we were sold!

We were excited and somewhat relieved to have an Australian-based, client-focused telecommunication provider that listened and understood our needs. Talking Business offers an extremely reliable and fast internet service on a very competitive business plan. Brett and his team actually deliver genuine customer service. They are proactive, accessible and responsive which in the telecommunications industry makes them a stand out.

We have now been working with Talking Business as our telecommunications provider for the past eight months and are truly thankful for the difference their service has made to our business.

Thank you to Brett and his team for all of their support.
